

brussoni

DEL PLANO AL ESPACIO VIVIDO.

Mosaicos y superficies

Materia que construye identidad.

Mosaicos, piezas cerámicas y superficies para proyectos de interiorismo y arquitectura. Texturas, geometrías y acabados para integrar materialidad, proporción y detalle.

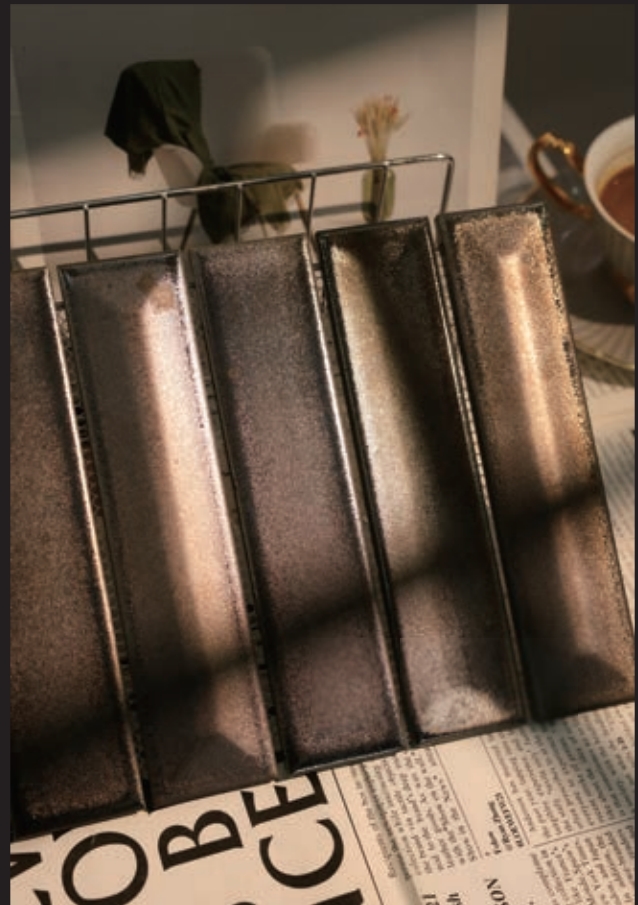

Una colección de ambientes y referencias, con formatos y detalles para acompañar cada proyecto.

Mosaico lineal efecto cemento

b.

El lenguaje del cemento se integra en una estética minimalista que prioriza la sencillez espacial. La textura del mosaico lineal aporta ritmo y construye una percepción visual depurada.

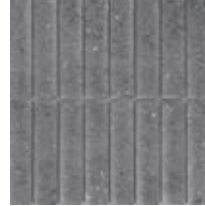

RC-0098

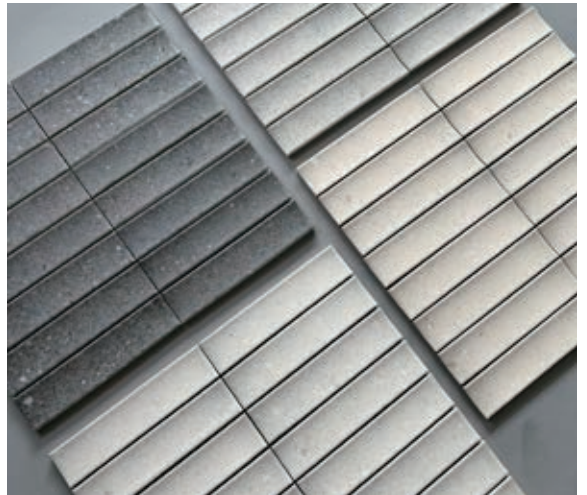

b.

El color define el carácter del espacio. La combinación de matices crea composiciones con identidad propia.

Mosaicos sobre malla

01 Alisado

Preparar un soporte perfectamente liso, uniforme y blanco. Las diferencias de color del sustrato alteran la apariencia final del mosaico.

02 Trazado de guías

Disponer tres placas en el piso manteniendo entre ellas la misma junta que entre teselas. Medir el conjunto y trasladar esa medida en horizontal y vertical para formar una retícula; cada módulo corresponde a nueve placas.

03 Preparación del adhesivo

Extender adhesivo sólo sobre el área de las primeras nueve placas. Aplicar primero una capa con el lado liso de la llana y luego peinarla de manera uniforme con el lado dentado.

04 Colocación

Aplicar directamente sobre el adhesivo las placas montadas en malla. En muros, orientar verticalmente los hilos más gruesos. La junta entre placas debe igualar la junta entre teselas.

Mosaicos sobre malla

05 Adherencia firme

Con las placas posicionadas, presionar y golpear suavemente con una llana de goma para que la malla quede correctamente embebida en el adhesivo.

06 Ajuste final

Antes de que el adhesivo fragüe, verificar que todas las juntas sean uniformes. Si es necesario, cortar la malla con un cúter y acercar o separar levemente las teselas con ayuda de la llana.

07 Pastinado

Cargar la pastina sobre la llana de goma y aplicarla en diagonal: primero de abajo hacia arriba y luego en sentido contrario. Rellenar por completo todas las juntas y retirar el excedente.

08 Limpieza

Antes de que la pastina endurezca, limpiar con movimientos circulares usando una esponja húmeda. Retirar los residuos con una segunda agua y finalizar con agua limpia hasta dejar la superficie sin velos.

Producto cerámico: manipular con precaución; las piezas rotas pueden causar lesiones. Para cortar, usar cortadora de baldosas o vidrio y pulir el canto con piedra abrasiva; no usar lijadora. Evitar limpiadores fuertemente ácidos o alcalinos y, en superficies antideslizantes, mopas que desprendan fibras. Las medidas son nominales y pueden variar según el lote; verificar antes de distribuir y cortar.
